Customer Notes:

- Repair cafe booking will be a plugin database; once you go to the booking page, it will list.
- Liked that the repair cafe had its own colour scheme, international colours.
- Front page, white font hard to read, put something dark behind it so it's easier on the eyes.
- NO MOUNTAIN SHAPES.
- Colours are nice (home page)
- The pollinator does not have to be really big on screen; shrink it to the left or right with the description. First graphic coming on the page.
- Pollinator blog post is okay; doesn't want to do too much work. Link helps with pictures.
- Plugin, blog post, but not quite. Image for every newsletter. 3rd party.
- People like images
- Can use any images on the actual website such as in the Newsletters
- Not sure if people would know what the pollinator is on the home page.
- Simplistic
-
